## NEWS RELEASE

### Pathway BioLogic Announces Registration of PowerCoat® and BioPath® in Honduras

**June 17, 2019 – Plant City, FL:** Pathway Biologic, LLC is pleased to announce it has received registration in Honduras for two of its flagship products, PowerCoat and BioPath. PowerCoat – formulated to be impregnated on dry fertilizer, and BioPath – which can be blended with liquid fertilizer or tank-mixed, have consistently shown to improve nutrient use efficiency, promote stronger root systems and improve crop quality and yield opportunities.

As part of a grass roots movement to expedite emergent agricultural technology market access and adoption in Honduras Agriculture, Darwin Calix, Executive Director of the National Agricultural Institute, and his colleagues visited Pathway BioLogic's facilities to witness first hand the technological advancements Pathway has made.

"Pathway is excited about potential opportunities within the Honduras agriculture market," says Michael Gans, Director of Operations for Pathway BioLogic. "We are looking forward to working with Mr. Calix and the Agricultural Institute on future initiatives."

**About Pathway Biologic:** Pathway Biologic is an applied microbial science company and emerging leader in the rapidly growing field of microbial products with services and solutions that are technology independent. Pathway BioLogic develops superior microbial solutions for optimized plant growth, nutrient use efficiency, and animal health that provide exceptional performance and ROI and are committed to providing the innovations that will help sustain crops around the world.
